Final Project

Group Name: Avengers

Group Members: Akanksha Mandala, Mallika Beeraka, Pushpa Priya, Naga Sai Yanala, Balaji Kalli

Project title: Pharmaceutical Management System

Semester and year: 1st semester, (Fall 2022)

Course Name and Number: Fundamentals of Programming

Instructor name: Indranil Roy

Project description:

This project is all about using a retail store to sell different items. Through this retail store, we sell different hospital equipment required for everyone. This database will record the medical gear utilized in hospitals. And we will also maintain the details of the stocks, buyers, and also customers. And we have to maintain the list of payments paid and pending.

Software tools:

Eclipse, Mysql, MySQL workbench

Programming languages:

Java

Output:

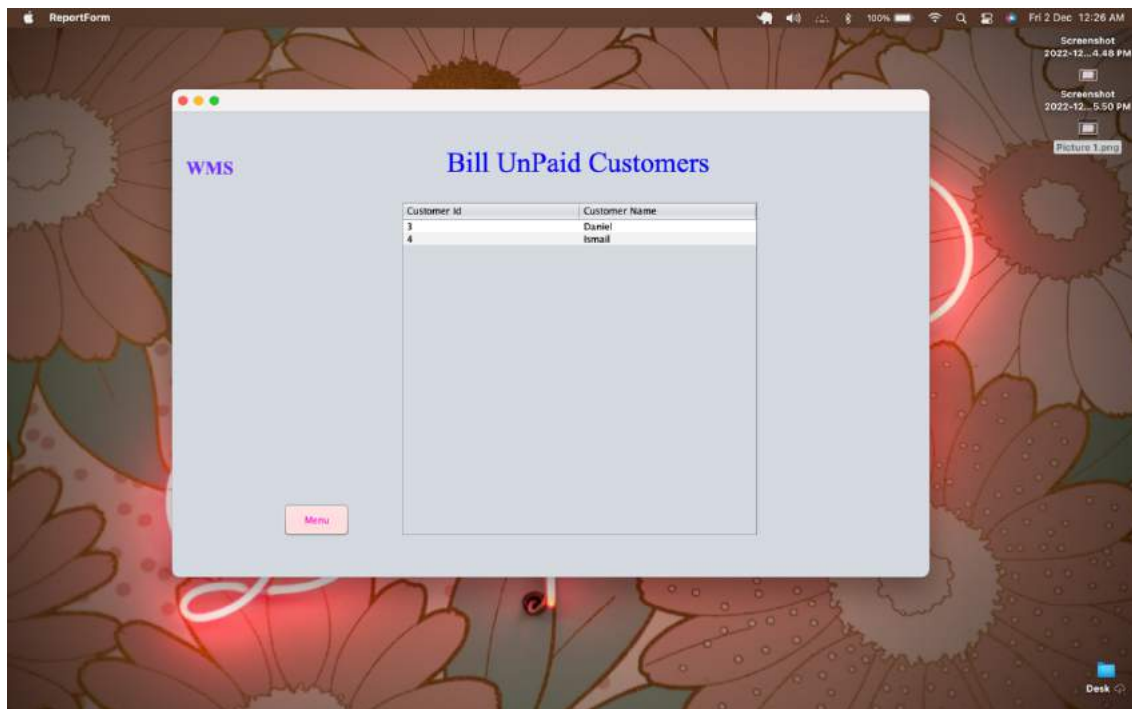

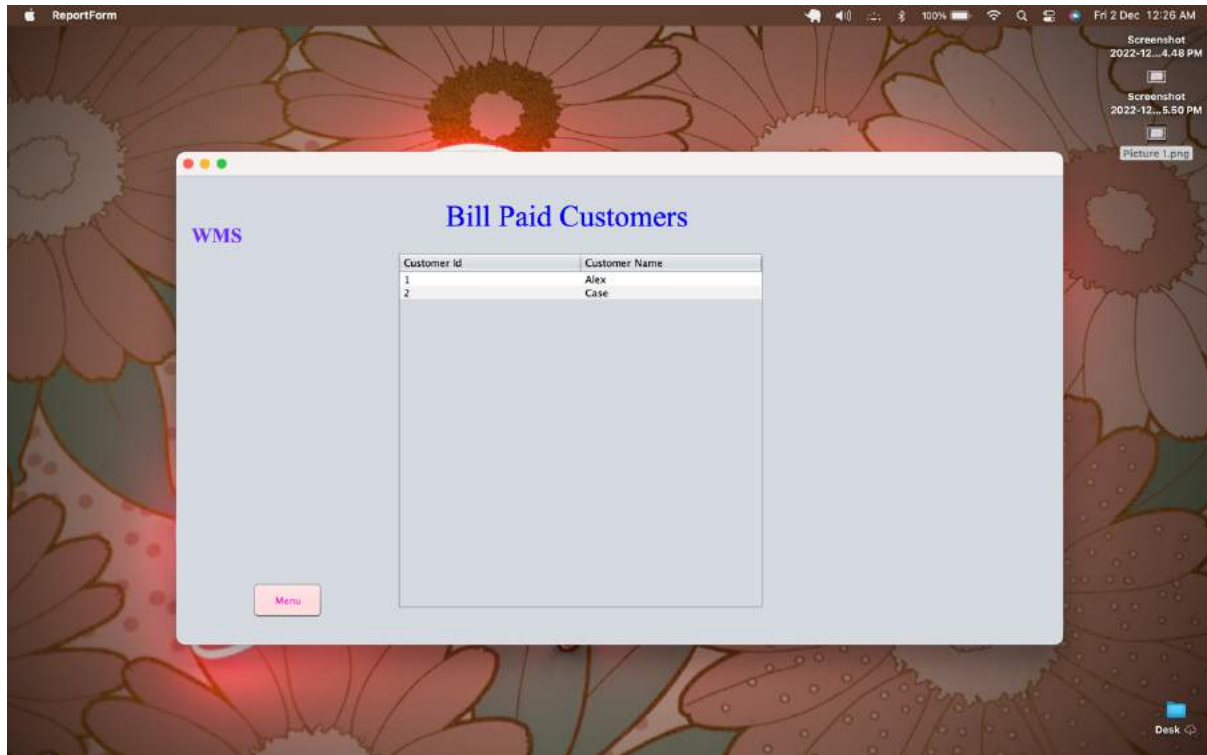

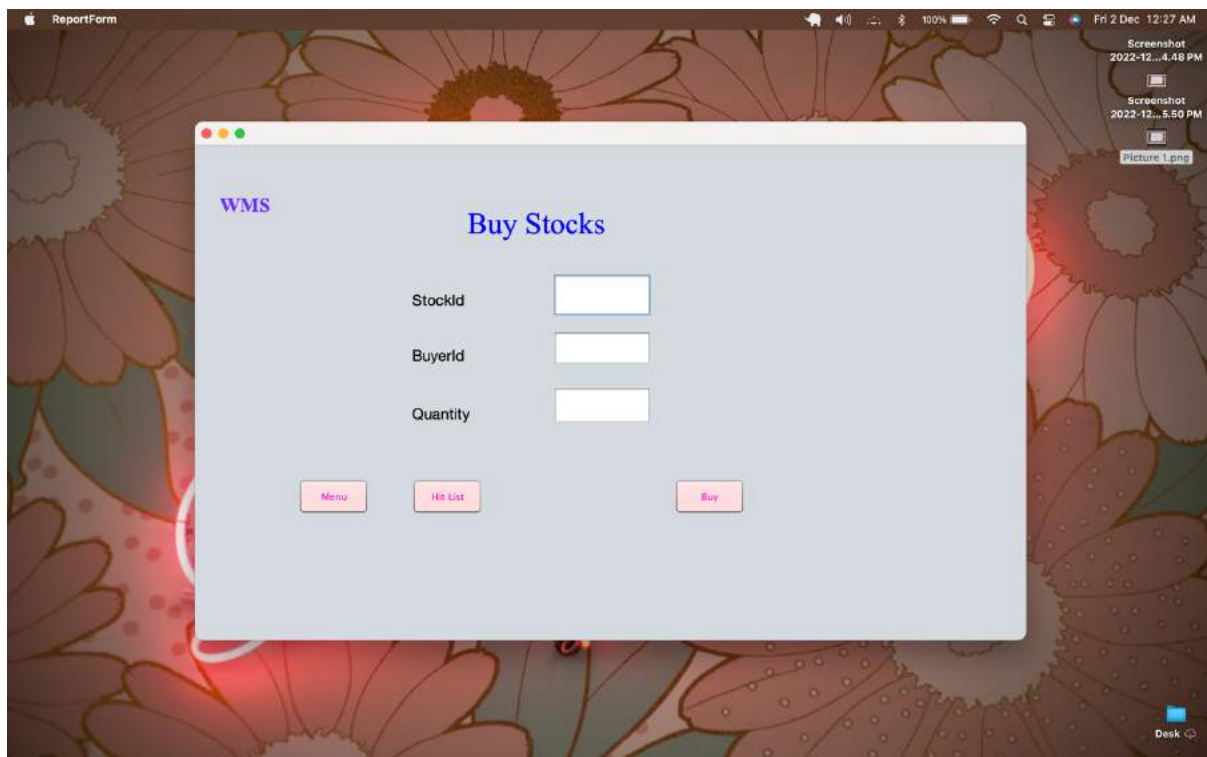

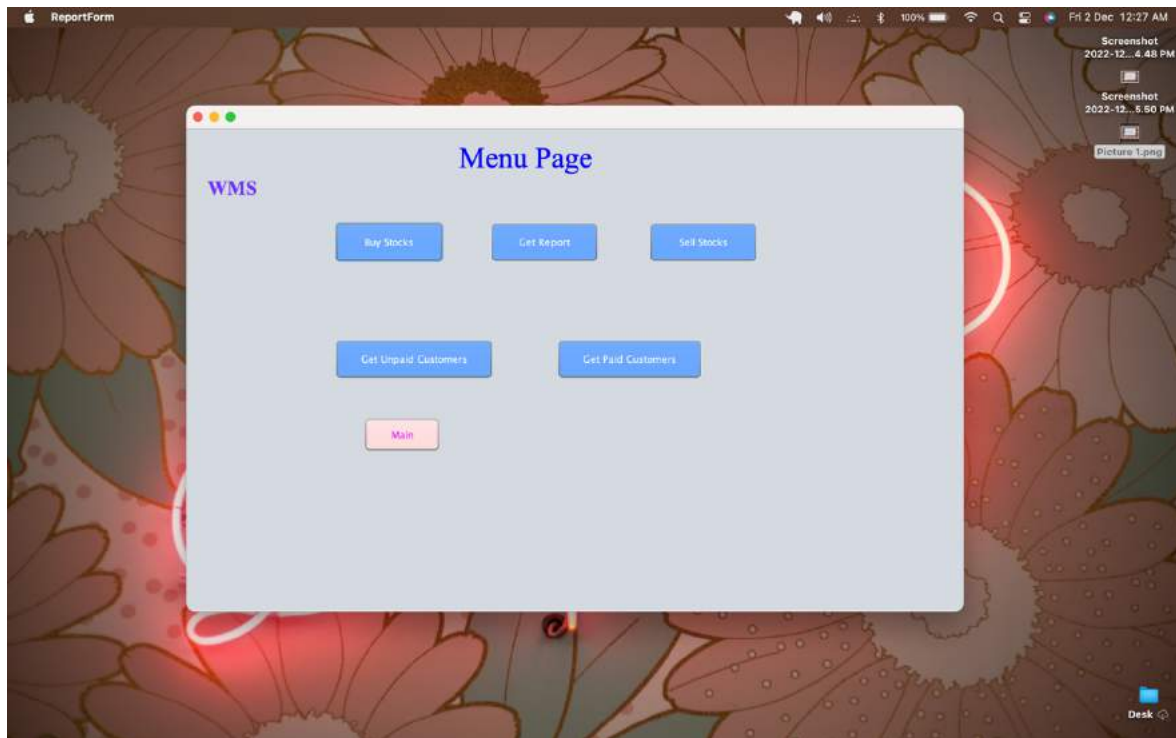

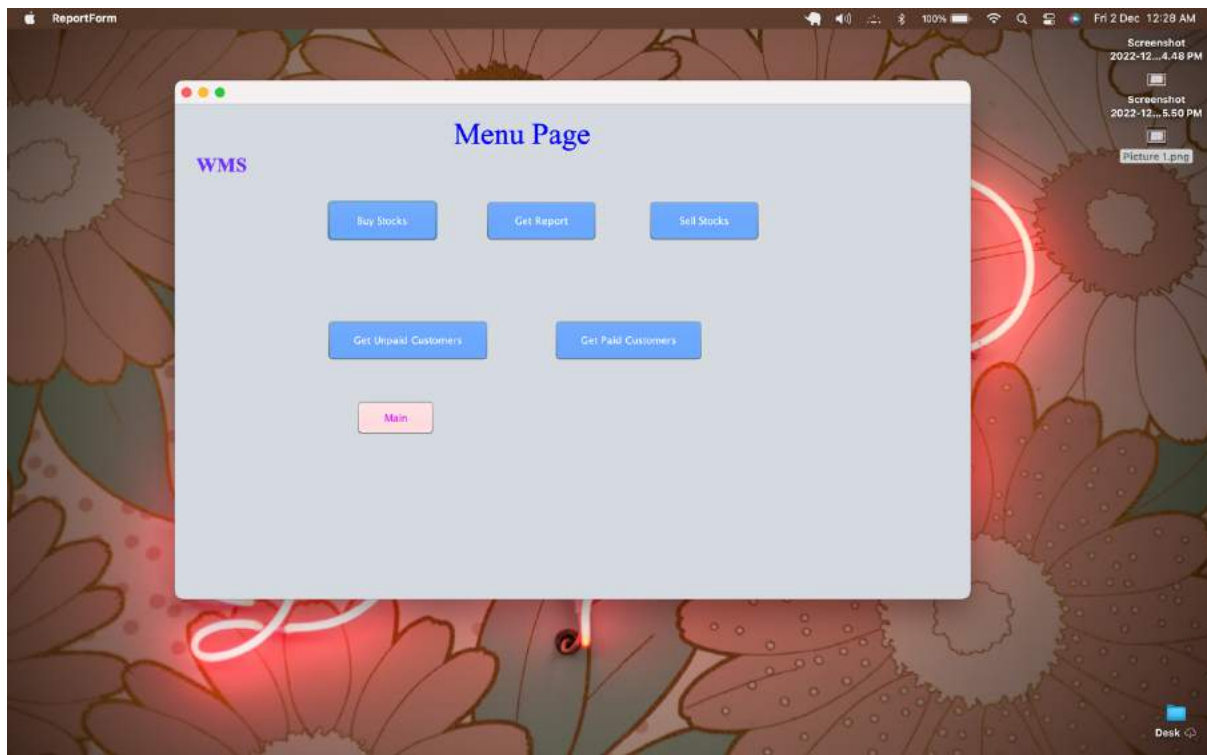

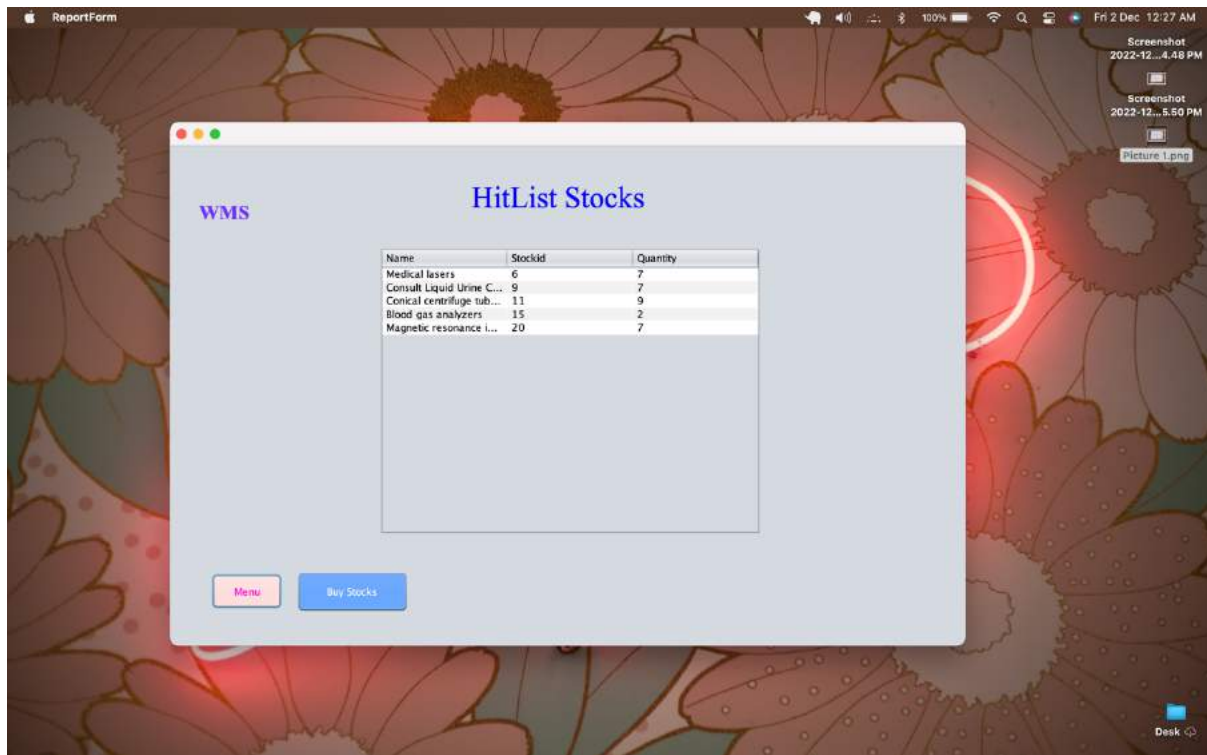

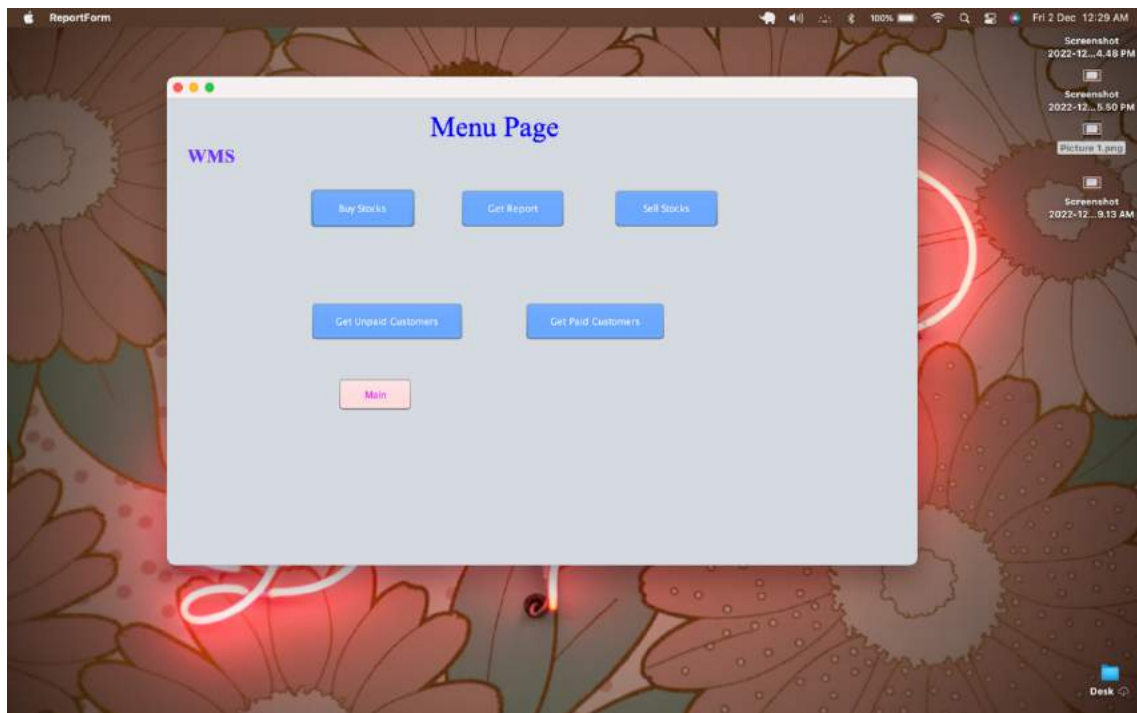

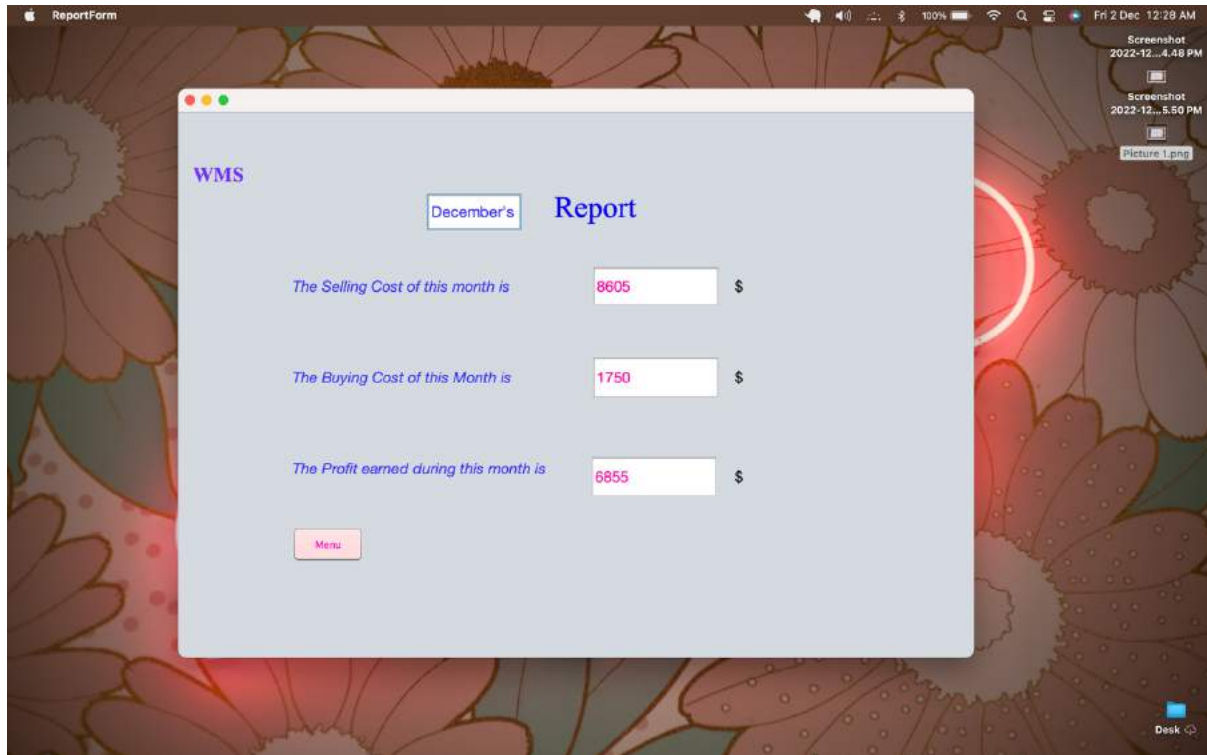

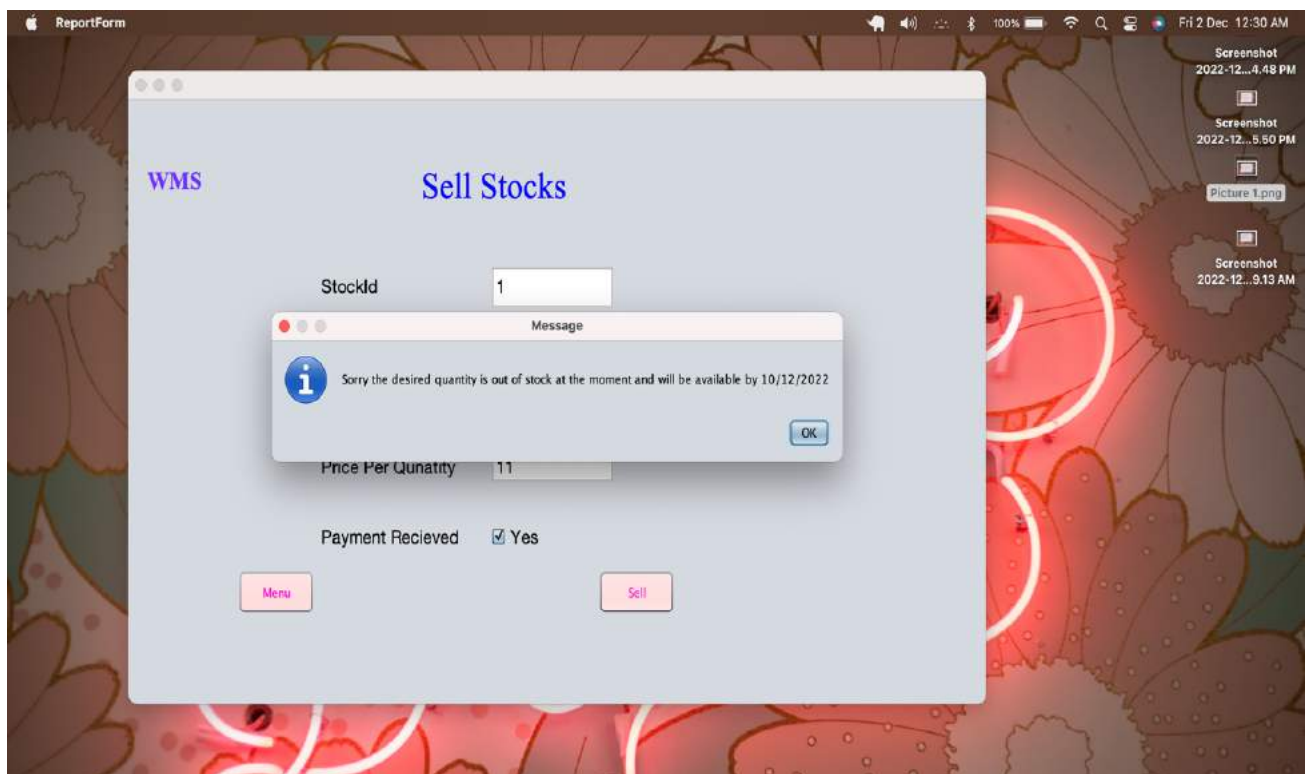

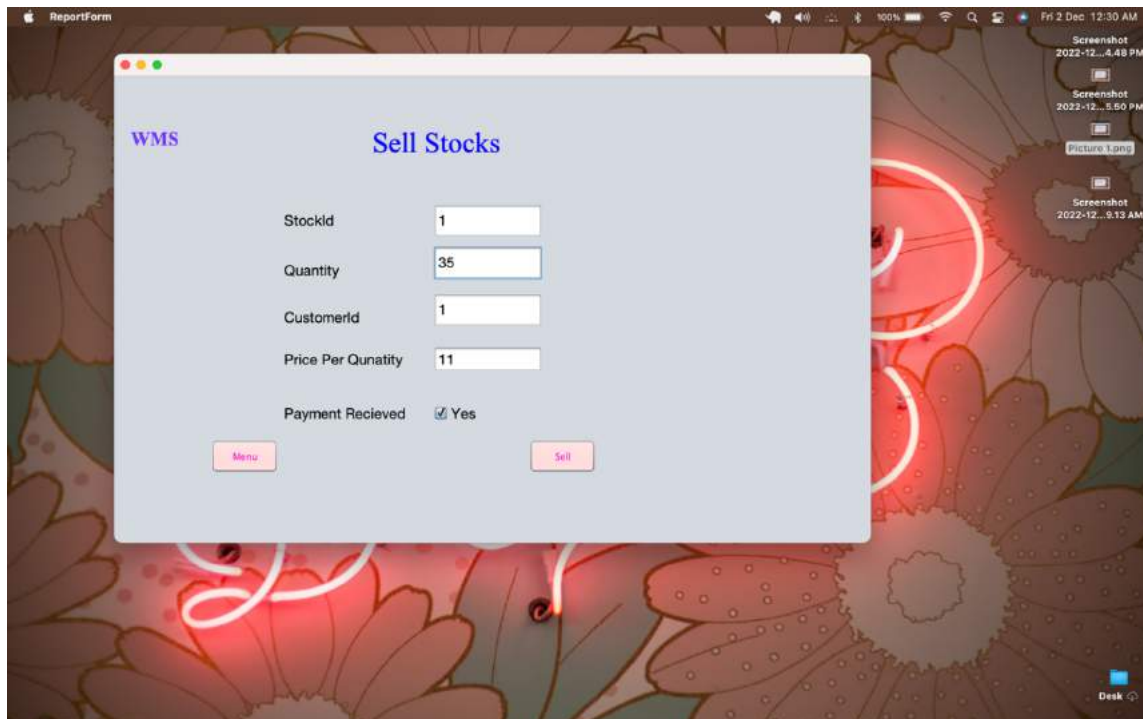

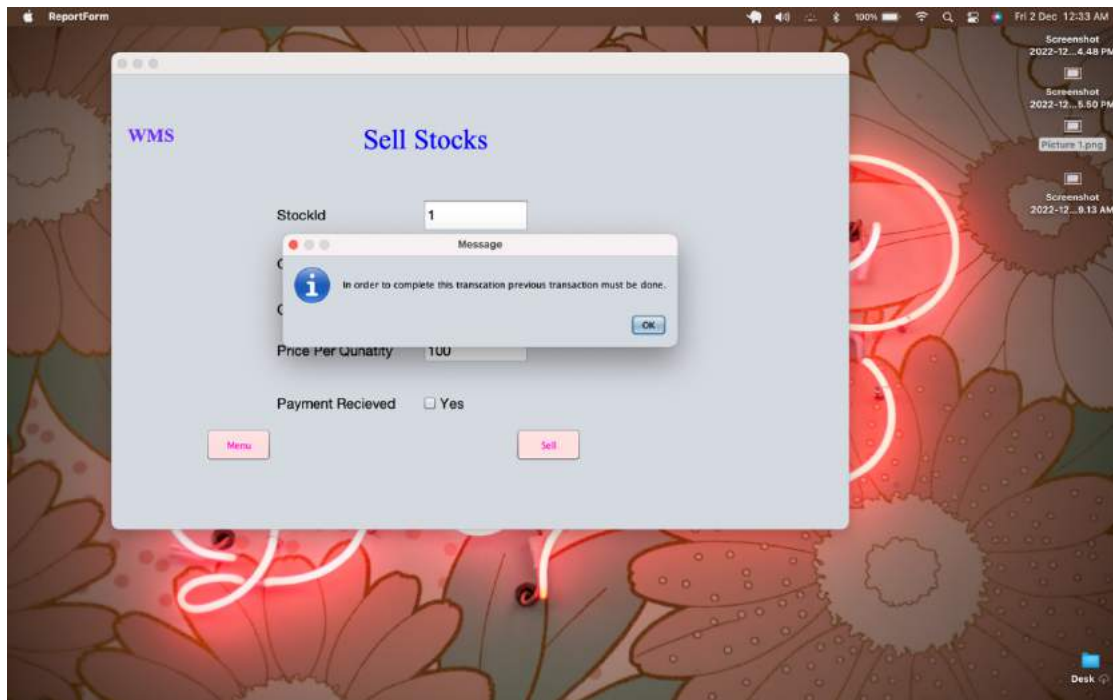

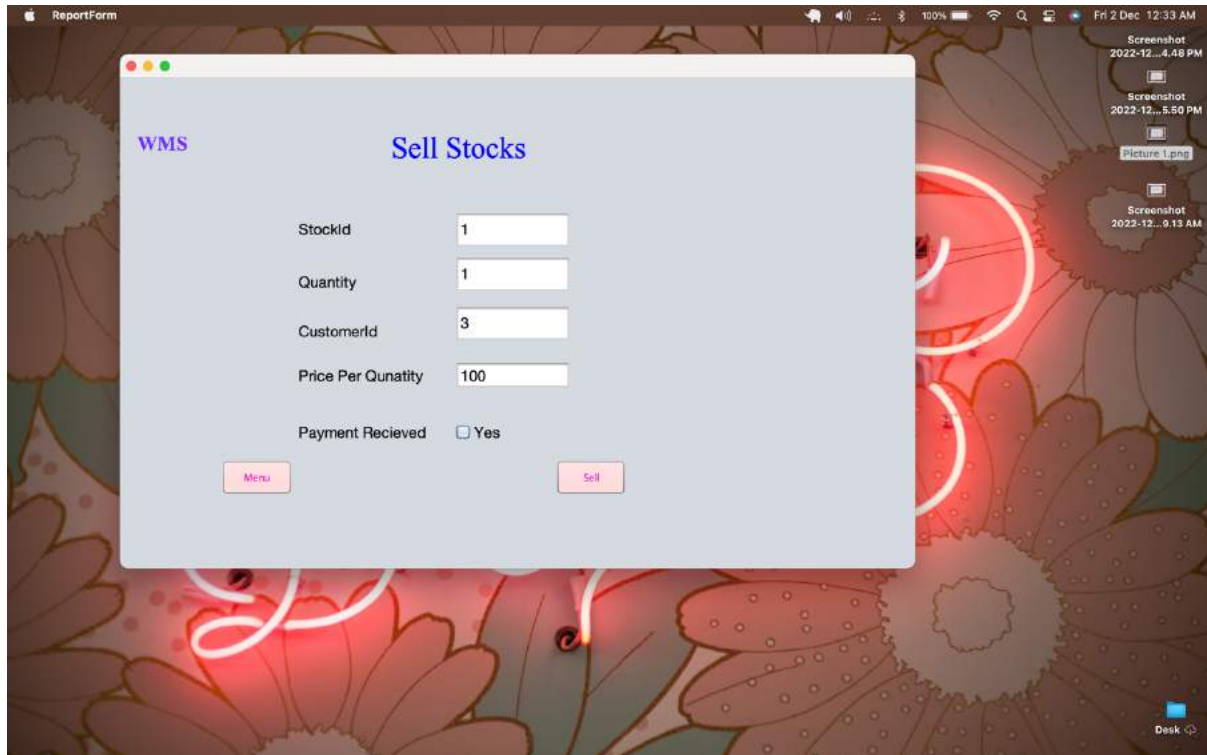

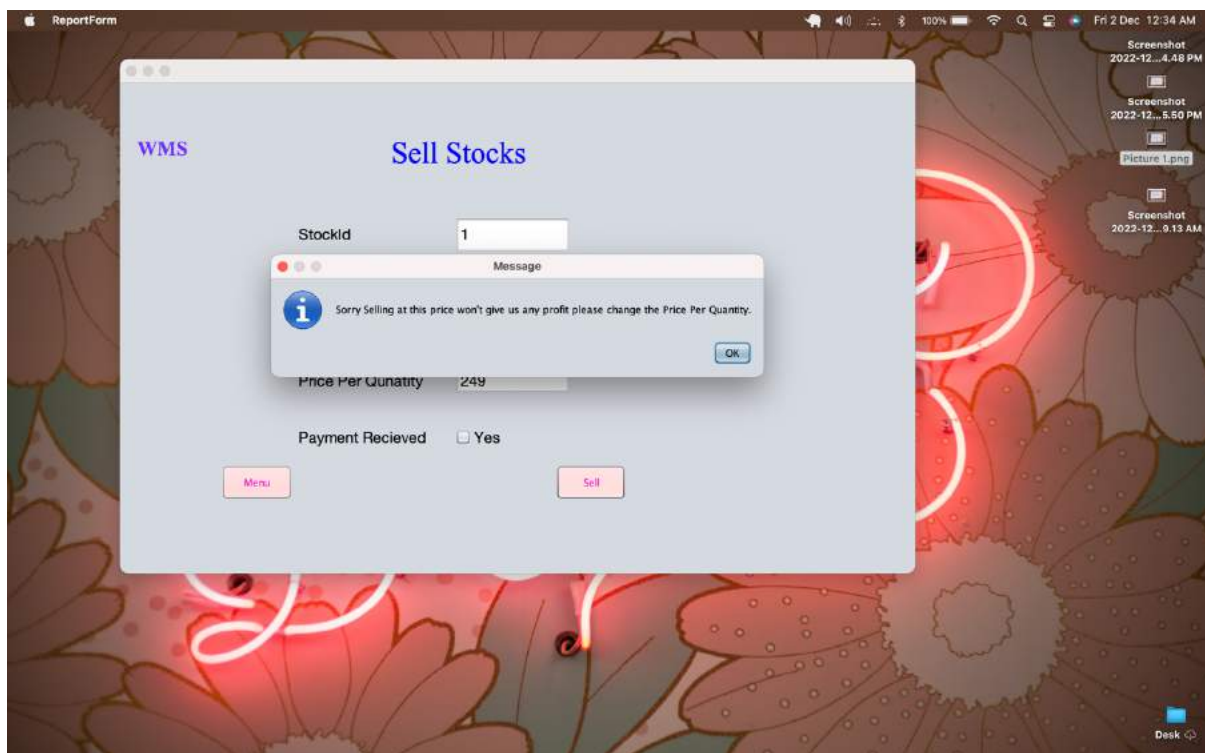

Screen of the Produced warning when the quantity of an item goes less than a particular amount

Buying Cost of the stock with id 1 is 250\$ trying to sell it for one dollor less i.e 249 gives us an error.

Conclusion:

The overall experience was good. We as a team, have learned many things while designing GUI. We had invested an ample amount of time to complete this project.

While we have learned many things through the process of building this project, it helped us to learn new things in java. These inputs will be helpful for us in future projects as well.
